

PERSONAL ADAPTIVE MEDICINE

# We bring personal medicine to you

PERAMEDIC is developing a stand-alone drug formulation system for personalised medicine, offering locally prepared, individually customised, segmented release polypills, with an inherently digital technology drive.

## Personal

- Designing your own customised pill containing all your different medications, with individually tailored dosing and release rates

## Adaptive

- Building the 3D pill composed of up to 100 micropockets, each programmed to release their content at just the right time

## Medicine

- Keeping medications in their ideal therapeutic window, known to maximise efficiency and reduce side effects
